

**A Drinking Water System
that is customized for the
drinking water you desire
using 4 to 10 stages.**

CDS

MADE IN USA

H₂O TO GO

CDS

Custom Drinking Station

**Customizable Options
Include:**

- ≡ **Filtered**
- ≡ **Traditional
Reverse Osmosis**
- ≡ **Replenished with
natural minerals**
- ≡ **Alkaline Water**
- ≡ **Additional Filters**

***Custom Spigot Colors Available**

Stage 1

Multi Stage Pre Filter

Triple layered

Traps particles of 5 microns or larger

Surpasses Industry Standards

Stage 2

Coconut Carbon Block

100% organic coconut shell carbon

Removes organic & inorganic chemicals, VOCs, chlorine, taste, and odor

Surpasses Industry Standards

Stage 3

Semipermeable Membrane

Produces 75 GPD

Removes all harmful elements such as viruses, bacteria, biological & chemical contaminants to 0.001 microns, only allowing pure water molecules for consumption

Stage 4

Customizable Filter

GAC Filter

1 stage

1 Stage

≡ Granular Activated Carbon

Polishes water for a clean taste

Mineral Filter

4 stages

4 Stages

≡ Granular Activated Carbon

≡ Potassium

≡ Magnesium

≡ Calcium

Replenishes with natural minerals for healthier, better tasting water with a neutral ph

Alkaline Filter

7 stages

7 Stages

≡ Alkaline Ceramic Balls

≡ Calcium

≡ ORP Balls

≡ Tourmaline

≡ Far infrared

≡ Magnesium

≡ Magnetic field

This seven stage process will provide antioxidant enriched alkaline water with many trace minerals added for optimal taste and hydration
